

IN THE SPECIFICATION:

Kindly amend the following paragraphs of page 7 of the specification as follows:

Turning now to Fig. 2 there is shown a alternate commode 10 and since many of the components are similar or the same as in the Fig. 1 embodiment, like numbers have been used for like components. In this embodiment, however, the 30' is slid into and out of its operative position beneath the commode seat 40 by a downward L-shaped flange 44 beneath and extending along the lateral sides of the elongated opening 42 in the commode seat 40. Thus, rather than lifting the commode seat up to remove the pan 30', it is convenient to install and remove the pan 30' by simply sliding it into and out of its contiguous position beneath the elongated opening 42.

Turning now to Figs 3A and 3B, there are shown, side views, partly in section, showing the 30, 30' of the present invention. In the Fig. 3A embodiment, it can be seen that the circular bottom 36 is a solid bottom and therefor the pan 30 is intended for use as a stand alone commode with the pan as a pail to collect and retain the waste materials. In the Fig. 3B embodiment, there is an opening at ~~44~~ 45 in the circular bottom 36 of pan 30' and that embodiment is intended for use where the commode is located over a household toilet that the waste material is discharged directly into the toilet. As also seen in both Fig. 2A 3A and 3B 3B, the front surface 38 of the pan 30, 30' curves downwardly and the circular bottom 36, 45 is displaced rearwardly with respect to the midpoint of the length dimension L so that the pan 30' can be used with an elongated opening in the commode seat and the curved front

PATENT

surface 38 can direct the waste products rearwardly to the center of the household toilet for discharge into that system.

It is understood that the invention is not limited to the illustration described and shown herein, which are deemed to be merely illustrative of the best modes of carrying out the invention, and which are suitable of modification of form, size, arrangement of parts and details of operation. The intention rather is intended to encompass all such modifications which are within the spirit and scope and defined by the claims.
